ESTONIAN FISHERMEN NOT DELIVERING FISH -- Sovetskaya Estoniya,
No 221, 17 Sep 48

Results for the first 7 months of 1948 indicated that a number of enterprises under the Ministry of the Fish Industry Estonian SSR were among those lagging in the fulfillment of their plan obligations.

The Ministry of the Fish Industry of the Republic completed 78 percent of its annual plan for the catching and processing of fish.

The majority of the fishing artels of "Estrybaksoyuz" (Estonian Fishermen's Union) are still not fulfilling the plan for the catching of fish. Out of 68 artels, 44 did not meet their August quota. This means that two thirds of the fishermen in Estonia are behind in their deliveries to the State.

The fault lies with the directors of "Estrybaksoyuz" and the Ministry of the Fish Industry. These are not taking decisive measures against saboteurs who disrupt the State plan for catching and preparing fish. The responsibility also lies to a large extent with the local representatives of the Fishermen's Union who do not demand from each fisherman the unconditional fulfillment of his obligations.

The setting up of central docks at all procurement points would eliminate the opportunity for fishermen to conceal their catches and to sell their fish on the side.
